

Nourishing Snacks

If you cannot eat full portions of meals, including snacks between meals can help to increase your overall intake of food and nutrients. Try to have 2-3 small nourishing snacks per day in addition to meals, so that you are eating little and often regularly.

Important note: Snack ideas are listed below and have been split into savoury and sweet options. Guidance has also been given on their texture, if you have been recommended a texture modified diet, you can try options from the appropriate section. If you are **not** following a texture modified diet, you can try options from any section.

Savoury snacks - Normal texture and Easy to chew (EC) options

- 1 slice of toast and peanut butter (EC if lightly toasted and no crust)
- 1 crumpet with butter (EC)
- 2 crackers with cheese or pate
