Sensory Processing Differences Affecting Everyday Activities:

Our '**Let's Make Sense Together'** resource provides practical information and strategies for parents, carers and school staff to help understand sensory processing differences and help support children in their daily lives. This resource has been created by healthcare professionals from York and Scarborough Teaching Hospitals Foundation Trust and are shared with permission as universal resource applicable to children of all ages.

Click the link below to access the 'Let's Make Sense Together' resource:

*Please note that when accessing the below website for the first time, you will be asked to share your location and GP; this helps the website personalize the information to your needs. The resources in age group 1-4 are useful for all age groups.

This is signposting for your information, not for a referral into a different service.

Sensory Processing | Child Development - Child 1 to 5 years | Child 1 - 4 years | Healthier Together
